TAPING

The CBC strap cutter ensures that plastic or steel strap waste volume is reduced, therefore the waste can be recycled more easily. The machine cuts the strap into 85 mm pieces. The CBC can process plastic and steel straps, including seals. The maximum width of the strap is 32 mm. The strap shredder is placed on a barrel in which the shreds are collected. After the strap is inserted, the machine ensures that all strap is processed.

Advantages

- For all types of steel strapping, PET and PP strap
- Also cuts the metal seals
- Capacity 30 meters per minute
- Facilitates easy recycling
- Saves waste volume
